

WHAT IS CLAIMED IS:

1. A refrigerator comprising a main body formed with a storage compartment, a door hingedly connected to the main body; and at least one shelf provided inside the storage compartment,

the shelf comprising:

a glass on which foodstuffs are laid;

a glass supporter coupled to edges of the glass;

a pair of supporting brackets provided in opposite sides of the glass supporter and supported onto a wall of the storage compartment; and

a coupler coupling the glass supporter with the supporting bracket.

2. The refrigerator according to claim 1, wherein the coupler comprises a screw.

3. The refrigerator according to claim 2, wherein the glass supporter comprises a main portion coupled to the edges of the glass; and a bracket coupling portion extended downward at opposite sides of the main portion and formed with a plurality of coupling bosses, and

the supporting bracket is formed with a screw through hole through which the screw is coupled to each coupling boss.

4. The refrigerator according to claim 3, wherein the bracket coupling portion comprises a plurality of

supporting ribs formed between the coupling bosses, and

the supporting bracket is formed with a bending portion fitted to the supporting ribs and supporting the main portion.
